

Welcome

The Information Technology Architects

- Logical data architect
 - Logical data base designer
 - Logical subject area architect
- Logical process architect
 - Program designer
 - Logical applications integrator

Hello and welcome to this You Tube presentation on the Information technology architect – also known as the logical data architect and the logical process architect. My name is Charles Richter and I am the principal consultant of Ripose Pty Limited. In my introduction to the Information Architect, I mentioned that I would be delivering this presentation on the responsibilities of the information technology architect categories or classes of the information architect. As can be seen from the structure the logical data architect is sub divided into the logical data base designer and the logical subject area architect; whilst the logical process architect is sub divided into: the program designer and; the logical applications integrator. There is no need for me to deliver a presentation on either the logical data architect or the logical process architect as I will be covering 4 categories of the sub categories of the information technology architect, please refer to the appropriate YouTube presentation covering the details of each.

As ripose.org is primarily responsible for the production of these presentations, you could assist us by purchasing the pdfs of these presentations for any amount you like. Please send [me an e mail](#) for further information.

The next lecture you may wish to view will address the responsibilities, inputs, process and outputs of one of the IT Architect (ITA) grades 1 through 6 as well as the a Test Architect (TA) grades.

Thank you for viewing this presentation

In closing I would like to thank you for viewing this presentation. As I mentioned at the start of this presentation, I will be creating presentations covering the responsibilities, the inputs processes and outputs and possibly examples of the output for each of the remaining Information Architecture grades, namely the information technology architect grades 1 through 4 and then grades 5 and 6 followed by the 2 test architect grades. It may take a while for me to complete all the presentations, so please bear with me. If you are eager to pursue a presentation of a grade that I am not yet ready to post, please visit our [web site](#), select the Quick links drop down menu and select Ripose architects. You can always send [me an e mail](#) for more information. Once again, thank you for your attention.
